

DARK WEB MONITORING

Get back visibility over targeted attacks

HACKING IS A BUSINESS, THE DARK WEB IS ITS MARKETPLACE

A cyber attack happens every 39 seconds in the world.¹ Cybercriminals are not a handful of hacktivists anymore, they're businessmen. Ready-to-use hacking tools are all over the place. It has never been easier to find them. But what about tracking them?

KEEP YOUR FRIENDS CLOSE AND YOUR ENEMIES CLOSER

Gain visibility into hackers' hidden channels to protect your business from cyber threats.

Unmatched coverage

Know what hackers talk about on the Deep Web, Dark Web and instant messaging applications.

On-demand investigations

Understand the threats they bring to your business, access in-depth investigations to counter attacks.

KEY FEATURES

10M new Dark Web posts scanned each month.

600k new discussions monitored each month, incl. Whatsapp & Telegram private groups.

125k new threads monitored each month, incl. IRC and Discord channels.

KEY BENEFITS

6 Get access to hackers' communities instantly, save up to 6 months of infiltration.

0% False positives. No additional resources are required on your end.

49 Identify cyber threats 49 days before they get to your business.²

CybelAngel provides an excellent monitoring service of the Deep & Dark Web. They found threats very specific to our company. Their team is always available and quick to respond.

ALWAYS ON POINT, ALWAYS RELEVANT

Millions of potential threats, but only one relevant incident report to handle.

Risk assessment

Understand the potential impact of the threats.

Detailed incident context

Access precise information on the sources and the bad actors.

Sample of exposed data

Focus on an extract of the most sensitive data to better assess the risk.

Targeting
4/4 Critical
Incident report - AJ8HK0
2020-07-09

The publication was posted by a threat actor named ExampleBears99. This actor sells accesses to a proxy IP 0.0.0.0 with detailed information linked to an unpatched vulnerability CVE 0000001. Our tools found the same accesses for sale on 3 other platforms.

This actor has a history of targeting oil & gas companies and seems to be related to known threat actors such as FancyExample and APTacme, as described in the graph below.

TAKE IT ONE STEP FURTHER WITH ON-DEMAND INVESTIGATIONS

Rely on a team of cybersecurity experts to investigate threats, quantify risks, and protect your business.

Are you looking to identify a potential new threat?

Do you want to know more about an existing one?

Are you trying to understand the methods of a cybercriminal group?
